Ecological Entomology

VOLUME 7 1982

EDITOR

J. H. LAWTON

EDITORIAL ADVISERS

J. M. CHERRETT, R. H. L. DISNEY,
H. F. VAN EMDEN, V. C. MORAN,
J. N. PERRY, B. SHORROCKS,
D. R. STRONG, Jr

BLACKWELL SCIENTIFIC PUBLICATIONS

OXFORD LONDON EDINBURGH BOSTON MELBOURNE

Contents

VOLUME 7, NUMBER 1, FEBRUARY 1982

WILLIAM BLOCK: Supercooling points of insects and mites on the Antarctic Peninsula 1–8

C. J. H. BOOIJ: Biosystematics of the *Muellerianella* complex (Homoptera, Delphacidae): host-plants, habitats and phenology 9–18

M. F. CLARIDGE and M. R. WILSON: Insect herbivore guilds and species–area relationships: leafminers on British trees 19–30

J. C. COULSON and JENNIFER BUTTERFIELD: The distribution and biology of Lonchopteridae (Diptera) in upland regions of northern England 31–38

CHRISTOPHER DYE: Intraspecific competition amongst larval *Aedes aegypti*: food exploitation or chemical interference? 39–46

H. C. EVANS: Entomogenous fungi in tropical forest ecosystems: an appraisal 47–60

CHARLIE GIBSON and MAYKE VISSER: Interspecific competition between two field populations of grass-feeding bugs 61–67

H. G. KLEMPERER: Normal and atypical nesting behaviour of *Copris lunaris* (L.): comparison with related species (Coleoptera, Scarabaeidae) 69–83

A. R. McCAFFERY and W. W. PAGE: Oviposition behaviour of the grasshopper *Zonocerus variegatus* 85–90

R. A. PRESTIDGE: Instar duration, adult consumption, oviposition and nitrogen utilization efficiencies of leafhoppers feeding on different quality food (Auchenorrhyncha: Homoptera) 91–101

JEFFREY K. WAAGE: Sib-mating and sex ratio strategies in scelionid wasps 103–112

B. ZELAZNY and E. PACUMBABA: Phytophagous insects associated with cadang-cadang infected and healthy coconut palms in South-eastern Luzon, Philippines 113–120

VOLUME 7, NUMBER 2, MAY 1982

J. J. BOOMSMA and J. A. ISAAKS: Effects of inundation and salt on the survival of ants in a sandy coastal plain 121–130

STEVEN P. COURTNEY and SARAH COURTNEY: The 'edge-effect' in butterfly oviposition: causality in *Anthocharis cardamines* and related species 131–137

JAMES C. FOGLEMAN: Temperature effects in relation to the patterns of distribution and abundance of three species in the *Drosophila affinis* subgroup 139–148

SCOTT W. GROSS and ROBERT S. FRITZ: Differential stratification, movement and parasitism of sexes of the bagworm, *Thyridopteryx ephemeraeformis* on redcedar 149–154

H. G. KLEMPERER: Parental behaviour in *Copris lunaris* (Coleoptera, Scarabaeidae): care and defence of brood balls and nest 155–167

PEKKA NIEMELÄ and ERKKI HAUKIOJA: Seasonal patterns in species richness of herbivores: Macrolepidopteran larvae on Finnish deciduous trees 169–175

MARTIN G. M. RANDALL: The ectoparasitization of *Coleophora alticolella* (Lepidoptera) in relation to its altitudinal distribution 177–185

K. E. REDBORG: Interference by the mantispid *Mantispa uhleri* with the development of the spider *Lycosa rabida* 187–196

N. W. SOTHERTON: Observations on the biology and ecology of the chrysomelid beetle *Gastrophysa polygoni* in cereal fields 197–206

M. STERNLICHT: Bionomics of *Prays citri* (Lepidoptera: Yponomeutidae) and their use in a model of control by male mass trapping 207–216

DONALD R. STRONG, Jr: Potential interspecific competition and host specificity: hispine beetles on *Heliconia* 217–220

P. G. WILLMER: Hygrothermal determinants of insect activity patterns: the Diptera of water-lily leaves 221–231

Short communication P. S. GILLER: The natural diets of waterbugs (Hemiptera-Heteroptera): electrophoresis as a potential method of analysis 233–237

VOLUME 7, NUMBER 3, AUGUST 1982

Y. CARTON and J. CLARET: Adaptive significance of a temperature induced diapause in a cosmopolitan parasitoid of *Drosophila* 239–247

SUSAN B. CHAPLIN and PATRICK H. WELLS: Energy reserves and metabolic expenditures of monarch butterflies overwintering in southern California 249–256

SIMON V. FOWLER and JOHN H. LAWTON; The effects of host-plant distribution and local abundance on the species richness of agromyzid flies attacking British umbellifers 257–265

ROBERT S. FRITZ: An ant–treehopper mutualism: effects of *Formica subsericea* on the survival of *Vanduzea arquata* 267–276

B. D. JAMES and M. L. LUFF: Cold-hardiness and development of eggs of *Rhopalosiphum insertum* 277–282

D. B. JAYASINGH and C. A. TAFFE: The biology of the eumenid mud-wasp *Pachodynerus nasidens* in trapnests 283–289

H. G. KLEMPERER: Nest construction and larval behaviour of *Onitis belial* and *Onitis ion* (Coleoptera, Scarabaeidae) 291–297

DUNCAN A. MACKAY and MICHAEL C. SINGER: The basis of an apparent preference for isolated host plants by ovipositing *Euptychia libye* butterflies 299–303

N. J. MILLS: Satiation and the functional response: a test of a new model 305–315

T. J. PERFECT and A. G. COOK: Diurnal periodicity of flight in some Delphacidae and Cicadellidae associated with rice 317–326

MICHAEL C. SINGER and JOANNE MANDRACCHIA: On the failure of two butterfly species to respond to the presence of conspecific eggs prior to oviposition 327–330

T. R. E. SOUTHWOOD, V. C. MORAN and C. E. J. KENNEDY: The assessment of arboreal insect fauna: comparisons of knockdown sampling and faunal lists 331–340

G. J. TESTERINK: Strategies in energy consumption and partitioning in Collembola 341–351

BOOK NOTICES 353–354

VOLUME 7, NUMBER 4, NOVEMBER 1982

B. E. FREEMAN and K. ITTYEIPE: Morph determination in *Melittobia*, a eulophid wasp 355–363

M. P. HASSELL: Patterns of parasitism by insect parasitoids in patchy environments 365–377

ROBERT C. LEDERHOUSE: Factors affecting equal catchability in two swallowtail butterflies, *Papilio polyxenes* and *P.glaucus* 379–383

RICHARD E. LENSKI: The impact of forest cutting on the diversity of ground beetles (Coleoptera: Carabidae) in the southern Appalachians 385–390

A. C. LEWIS: Leaf wilting alters a plant species ranking by the grasshopper *Melanoplus differentialis* 391–395

ROBERT F. LUCK, HAGGAI PODOLER and RAMI KFIR: Host selection and egg allocation behaviour by *Aphytis melinus* and *A.lingnanensis*: comparison of two facultatively gregarious parasitoids 397–408

V. C. MORAN, B. H. GUNN and G. H. WALTER: Wind dispersal and settling of first-instar crawlers of the cochineal insect *Dactylopius austrinus* (Homoptera: Coccoidea: Dactylopiidae) 409–419

J. N. PERRY: Fitting split-lines to ecological data 421–435

BERNARD D. ROITBERG and RONALD J. PROKOPY: Influence of intertree distance on foraging behaviour of *Rhagoletis pomonella* in the field 437–442

JOHN SIVINSKI: Prey attraction by luminous larvae of the fungus gnat *Orfelia fultoni* 443–446

PETER D. STILING, BRENT V. BRODBECK and DONALD P. STRONG: Foliar nitrogen and larval parasitism as determinants of leafminer distribution patterns on *Spartina alterniflora* 447–452

V. J. TEPEDINO and P. F. TORCHIO: Phenotypic variability in nesting success among *Osmia lignaria propinqua* females in a glasshouse environment (Hymenoptera: Megachilidae) 453–462

M. R. TUCKER, S. MWANDOTO and D. E. PEDGLEY: Further evidence for windborne movement of armyworm moths, *Spodoptera exempta*, in East Africa 463–473

Short communication YOSIAKI ITÔ and ISOKO HATTORI: A kleptoparasitic moth, *Nola innocua*, attacking aphid galls 475–478

BOOK NOTICES 479–480
